## SPEAKERS

**Pascal Chazal** is owner of Hors Site, a French company specialized in offsite- construction and Patch.

*Patch intervenes in companies wishing to develop their production methods towards industrialization or prefabrication but also with manufacturers who wish to develop new markets or improve their production.*

*Pascal Chazal is key expert in industrialized and offsite construction and a for traditional construction. He claims that traditional construction has been proven to be highly inefficient in comparison with other industries. Furthermore the negative environmental effects of building in concrete is massive in terms of CO2 emissions, waste and use of natural resources.*

**Wayne Hill** is Production Strategy Director at L&Q Housing Association in London.

*Wayne Hill is the Director in charge of L&Q's Construction Innovation journey; a transformation from traditional construction, to fully used offsite technologies. Heading up an ambitious 10 year road map to cement L&Q as one of the industry leaders in MMC and Offsite construction.*

*Producing his own paper in 2011 'The future of UK Housing', Wayne is an active speaker and advisor in the UK, on MMC Housing transformation and Business change. A keen promoter of the benefits of 'knowledge sharing' and collaboration, he is also L&Q lead sponsor for the 'AIMCH' Innovate UK research project and the GLA/Cast 'PRISM' App*
